

Conference on Mechanism and Institution Design 2020 (CMID20)

Thursday 11 June 2020 - Saturday 13 June 2020

Book of Abstracts

Contents

Life cycle of startup financing	1
Manipulation of Attractiveness in Two-Sided Stable Matches	1
A strategic tax mechanism	1
Confidence Management in Tournaments	1
Implementation in undominated strategies with applications to economic environments	1
Stable Doctor-Hospital Matching Mechanisms under Distributional and Hierarchical Constraints	1
Allocating Positions Fairly: Auctions and Shapley Value	1
A comprehensive analysis of soccer penalty shootout designs	1
Land Reform Optimal Land Holdings and Redistribution	2
Principal-Agent VCG Contracts	2
An economic theory of differential treatment	2
Mechanism Design with Narratives	2
The Role of Information Design in Facilitating Trust and Trustworthiness	2
Menu mechanisms	2
Neutral Public Good Mechanisms	2
The Core of School Choice Problems	3
Keynote - Thursday June 11 2020	3
Allocation with Correlated Information: Too good to be true	3
The Borda Rule on Top-Truncated Preferences: An Axiomatic Study	3
Coopetition Against an Amazon	3
Dynamics of Collective Litigations	3
Competitive Equilibria in Matching Models with Financial Constraints	3
On the equivalence of weak- and cyclic-monotonicity	3

Optimal Political Institutions in the Shadow of Conflict	4
Reciprocity in Dynamic Employment Relationships	4
Analysis of One-to-One Matching Mechanisms via SAT Solving: Impossibilities for Universal Axioms	4
Countervailing Power	4
Majority rule on rhombus tilings and Condorcet super-domains	4
Measuring Freedom in Games	4
Application Costs as a Screening Instrument in Decentralized Matching	4
Bargaining with Independence of Higher or Irrelevant Claims	5
Limit orders under Knightian uncertainty	5
Screening Inattentive Agents	5
College admissions with ties and common quotas	5
An Optimal Distributionally Robust Auction	5
Multi-Battle Contests Finite Automata and the Tug-of-War	5
Optimal Non-Linear Taxation of Externalities	5
A testing period model: Bayesian Persuasion meets Screening	5
Implementation with farsighted agents	6
Matching with Minimum Quotas	6
The Balanced Threat Agreement for Individual Externality Negotiation Problems	6
Did the reforms of the matching systems make them more fair?	6
Dynamic Allocation without Money: the Limited Commitment Case	6
No-Regret Mechanisms for No-Regret Agents	6
The First-Price Auction under Strategic Uncertainty: Theory and Empirics	6
Persuading a Receiver With a Simplistic Worldview	7
Business Commonality Standardization and Product Cycles	7
Can society learn without opinion leaders?	7
Empirical strategy-proofness	7
Implementability of cooperative solutions	7
A Simple Model of the Power Elite	7
Efficient Liability in Expert Markets	7

Global Manipulation by Local Obfuscation	8
Contracting with endogenously incomplete commitment: escape clauses	8
Exploitative Priority Service	8
Flip a coin or vote? An experiment on the implementation and efficiency of social choice mechanisms	8
Momentum and Heterogeneity in Contests	8
Public Provisions of Professional Services	8
Equilibrium Contracts and Boundedly Rational Expectations	8
Minimum number of searches in a delegated search model with no monetary transfers	8
Signaling competence for re-election	9
Keynote - Friday June 12 2020	9
A General Framework for Studying Contests	9
Influential News and Policy-making	9
Pricing unverifiable information	9
School choice and loss aversion	9
Fuzzy Reciprocity: Contracting Limitations in Bidirectional Matching Markets	9
Voter Coordination in Large Elections	10
Contest with Incomplete Information: When to Turn Up the Heat and How?	10
Interim Correlated Rationalizability in Large Games	10
Optimal sequential contests	10
Pick-an-object mechanisms	10
Redistribution through Markets	10
Competition with Indivisibilities and Few Traders	10
Corporate bonds: Uniform auction under risk and budget limits	11
Information Design in Coordination Games with Risk Dominant Equilibrium Selection	11
Wasted Bribes: Designing Surprise Amnesties which Deter Collusion	11
Conditional Pure Strategy Dominance	11
Efficient Incentives in Social Networks	11
Eliciting information for decision making	11
Sensitivity of fair prices in assignment markets	11

Lattice structure of the random stable set in many-to-many matching markets	11
Truth-Telling Dominating Strategy: Impossibilities of Shill-Proofness	12
Optimal Auctions with Signaling Bidders	12
School Choice with Preference Rank Classes	12
Testing the sender: when signaling is not enough	12
Working to Learn	12
Screening with Frames	12
Tacit Collusion in Repeated Unit Commitment Auctions	12
Adverse Selection in the Market for Bank Capital with Heterogeneous Risk Preferences .	13
Decentralized Matching with Transfers: Experimental and Noncooperative Analyses . .	13
Blocking Pairs versus Blocking Students: Stability Comparisons in School Choice	13
Principled Mechanism Design with Evidence	13
Voter Attention and Distributive Politics	13
Deliberative Minipublics	13
The Fragmentation of Views in a Democracy	13
Selling two units of a customizable good	14
Strategy-proof and Efficient Mediation	14
A Small Volume Reduction that Melts Down the Market	14
Evaluating opportunities when more is less	14
Implementation of Reduced-Form Allocation Rules for Multiple Indivisible Objects under Constraints	14
Dynamic Model Persuasion	14
Optimal Project Design	14
Rational Learning in Voting for the Common Good: Optimal Committee Size and Rewards	14
Strategy-proofness in a mixed domain of single-peaked and single-dipped preferences .	15
Keynote - Saturday June 13 2020	15
Pareto Efficiency in Weighted School Choice Problems	15
Learning while Bargaining: Experimentation and Coasean Dynamics	15
Robust Binary Voting	15

The core for housing markets with limited externalities	15
Rights and rents in local commons	15
Competitive Information Disclosure to an Auctioneer	16
Optimal seller's revenue with asymmetric bidders	16
Price Skimming: Commitment and Delay in Bargaining with Outside Option	16
Deliberation and epistemic democracy	16
Gig Economy: a Dynamic Principal-Agent Model	16
Relational Contracts: Public versus Private Savings	16
Optimal Marketplace Design	16
A Universal Dynamic Auction for Unimodular Demand Types	16
Mean-Preserving Unawareness in General Equilibrium	17
Rationalizable Incentives: Interim Implementation of Sets in Rationalizable Strategies . .	17
Mediating Conflict in the Lab	17
Confidence Management in Tournaments	17

14

Life cycle of startup financing

15

Manipulation of Attractiveness in Two-Sided Stable Matches

16

A strategic tax mechanism

17

Confidence Management in Tournaments

18

Implementation in undominated strategies with applications to economic environments

19

Stable Doctor-Hospital Matching Mechanisms under Distributional and Hierarchical Constraints

20

Allocating Positions Fairly: Auctions and Shapley Value

21

A comprehensive analysis of soccer penalty shootout designs

22

Land Reform Optimal Land Holdings and Redistribution

23

Principal-Agent VCG Contracts

24

An economic theory of differential treatment

25

Mechanism Design with Narratives

26

The Role of Information Design in Facilitating Trust and Trustworthiness

27

Menu mechanisms

28

Neutral Public Good Mechanisms

29

The Core of School Choice Problems

30

Keynote - Thursday June 11 2020

31

Allocation with Correlated Information: Too good to be true

32

The Borda Rule on Top-Truncated Preferences: An Axiomatic Study

33

Coopetition Against an Amazon

34

Dynamics of Collective Litigations

35

Competitive Equilibria in Matching Models with Financial Constraints

36

On the equivalence of weak- and cyclic-monotonicity

37

Optimal Political Institutions in the Shadow of Conflict

38

Reciprocity in Dynamic Employment Relationships

39

**Analysis of One-to-One Matching Mechanisms via SAT Solving:
Impossibilities for Universal Axioms**

40

Countervailing Power

41

Majority rule on rhombus tilings and Condorcet super-domains

42

Measuring Freedom in Games

43

**Application Costs as a Screening Instrument in Decentralized Match-
ing**

44

Bargaining with Independence of Higher or Irrelevant Claims

45

Limit orders under Knightian uncertainty

46

Screening Inattentive Agents

47

College admissions with ties and common quotas

48

An Optimal Distributionally Robust Auction

49

Multi-Battle Contests Finite Automata and the Tug-of-War

50

Optimal Non-Linear Taxation of Externalities

51

A testing period model: Bayesian Persuasion meets Screening

52

Implementation with farsighted agents

53

Matching with Minimum Quotas

54

The Balanced Threat Agreement for Individual Externality Negotiation Problems

55

Did the reforms of the matching systems make them more fair?

56

Dynamic Allocation without Money: the Limited Commitment Case

57

No-Regret Mechanisms for No-Regret Agents

58

The First-Price Auction under Strategic Uncertainty: Theory and Empirics

59

Persuading a Receiver With a Simplistic Worldview

60

Business Commonality Standardization and Product Cycles

61

Can society learn without opinion leaders?

62

Empirical strategy-proofness

63

Implementability of cooperative solutions

64

A Simple Model of the Power Elite

65

Efficient Liability in Expert Markets

66

Global Manipulation by Local Obfuscation

67

Contracting with endogenously incomplete commitment: escape clauses

Corresponding Author: wolfgang.gick@unibz.it

68

Exploitative Priority Service

69

Flip a coin or vote? An experiment on the implementation and efficiency of social choice mechanisms

70

Momentum and Heterogeneity in Contests

71

Public Provisions of Professional Services

72

Equilibrium Contracts and Boundedly Rational Expectations

73

Minimum number of searches in a delegated search model with no monetary transfers

74

Signaling competence for re-election

75

Keynote - Friday June 12 2020

76

A General Framework for Studying Contests

77

Influential News and Policy-making

78

Pricing unverifiable information

79

School choice and loss aversion

80

Fuzzy Reciprocity: Contracting Limitations in Bidirectional Matching Markets

81

Voter Coordination in Large Elections

82

Contest with Incomplete Information: When to Turn Up the Heat and How?

83

Interim Correlated Rationalizability in Large Games

84

Optimal sequential contests

85

Pick-an-object mechanisms

86

Redistribution through Markets

87

Competition with Indivisibilities and Few Traders

88

Corporate bonds: Uniform auction under risk and budget limits

89

Information Design in Coordination Games with Risk Dominant Equilibrium Selection

90

Wasted Bribes: Designing Surprise Amnesties which Deter Collusion

91

Conditional Pure Strategy Dominance

92

Efficient Incentives in Social Networks

93

Eliciting information for decision making

94

Sensitivity of fair prices in assignment markets

95

Lattice structure of the random stable set in many-to-many matching markets

96

Truth-Telling Dominating Strategy: Impossibilities of Shill-Proofness

97

Optimal Auctions with Signaling Bidders

98

School Choice with Preference Rank Classes

99

Testing the sender: when signaling is not enough

100

Working to Learn

101

Screening with Frames

102

Tacit Collusion in Repeated Unit Commitment Auctions

103

Adverse Selection in the Market for Bank Capital with Heterogeneous Risk Preferences

104

Decentralized Matching with Transfers: Experimental and Non-cooperative Analyses

105

Blocking Pairs versus Blocking Students: Stability Comparisons in School Choice

106

Principled Mechanism Design with Evidence

107

Voter Attention and Distributive Politics

108

Deliberative Minipublics

109

The Fragmentation of Views in a Democracy

110

Selling two units of a customizable good

111

Strategy-proof and Efficient Mediation

112

A Small Volume Reduction that Melts Down the Market

113

Evaluating opportunities when more is less

114

Implementation of Reduced-Form Allocation Rules for Multiple Indivisible Objects under Constraints

115

Dynamic Model Persuasion

116

Optimal Project Design

117

Rational Learning in Voting for the Common Good: Optimal Committee Size and Rewards

118

Strategy-proofness in a mixed domain of single-peaked and single-dipped preferences

119

Keynote - Saturday June 13 2020

120

Pareto Efficiency in Weighted School Choice Problems

121

Learning while Bargaining: Experimentation and Coasean Dynamics

122

Robust Binary Voting

123

The core for housing markets with limited externalities

124

Rights and rents in local commons

125

Competitive Information Disclosure to an Auctioneer

126

Optimal seller's revenue with asymmetric bidders

127

Price Skimming: Commitment and Delay in Bargaining with Outside Option

128

Deliberation and epistemic democracy

129

Gig Economy: a Dynamic Principal-Agent Model

130

Relational Contracts: Public versus Private Savings

131

Optimal Marketplace Design

132

A Universal Dynamic Auction for Unimodular Demand Types

133

Mean-Preserving Unawareness in General Equilibrium

134

Rationalizable Incentives: Interim Implementation of Sets in Rationalizable Strategies

135

Mediating Conflict in the Lab

136

Confidence Management in Tournaments
